

ANNUAL REVIEW

> SIMPLIFYING SECURITYHOLDER REPORTING

FACT SHEET

Reduce annual report content to increase relevance and facilitate securityholder engagement.

Feedback from investors suggests they are frustrated by receiving lengthy, hard to understand Annual Reports.

In response to this feedback, Computershare now offers a simple, easy to understand 'Annual Review' as an alternative.

The Annual Review document covers key areas many of your investors are interested in, including easy to understand financials, remuneration summary, and reports from the Chairman and CEO.

IMPROVE SECURITYHOLDER ENGAGEMENT

By providing clear, forward focused communications about your company, the review alternative delivers information in a format designed to engage 'Mum and Dad' investors.

REDUCE REPORTING COSTS AND PROVIDE SECURITYHOLDER CHOICE

Annual Report production accounts for a significant proportion of securityholder communication costs. The Annual Review alternative provides a quick win solution in cost reduction.

Investor choice is pivotal to improve and maintain investor satisfaction. Provide investors with choice by offering an effective, easy to understand alternative to the annual report.

SIMPLICITY IN SECURITYHOLDER MIGRATION

To simplify the migration of security holders from current communication methods to an Annual Review, Computershare has systems and processes setup to facilitate securityholder enquiry and participation.

HELP SAVE THE ENVIRONMENT

Each year an estimated 750 mega litres of water and 45,000 trees are utilised in the production of Australian securityholder communications. Make your contribution to the long term sustainability of our environment by implementing an Annual Review alternative.
