

# ISSUER ONLINE FOR GLOBAL ISSUERS

> GLOBAL REGISTRY REPORTING MADE EASY

## FACT SHEET

## Take advantage of the world's most advanced online global shareholder reporting system.

Multi-listed Issuers wishing to gain access to a consolidated view of all their Computershare administered registers and share plan records can now do so through Global Issuer Online, providing premium web features based on our Portis technology.

This sophisticated cross-register searching and reporting functionality, offered in conjunction with the Global Register™, ensures greater clarity and transparency of registered shareholder information for Issuers and their company secretariat.

### GLOBAL TOP HOLDER REPORTING

Generate reports, at the beginning and end of each month, on your top 200 global registered investors including Depositary Interest and American Depositary Receipt holders and their share movements, and utilise our early-warning mechanisms indicating when depositary accounts are out of balance with the underlying register.

### AGGREGATE REGISTER REPORTING

Create aggregate reports on issued capital, including Depositary Interest and American Depositary Receipt holdings, across all registers globally.

### GLOBAL HOLDER SEARCH

Enable Issuers to conduct holder searches across all registers, and seamlessly drill down into locally held information for more detail.

### DASHBOARD REPORTING

Gain a snapshot of data extracted from a suite of underlying reports that can be exported in multiple formats for easy portability.

### COST SAVINGS & ACCESSABILITY IMPROVEMENTS

Remove the burden and cost of multiple service providers and disconnected online systems, and gain greater clarity and transparency of registered shareholder information around the clock.
