

FACT SHEET

The most advanced online global shareholder reporting system.

Portis provides multi-listed issuers with a consolidated online view of all of their registers administered by Computershare, optionally incorporating their share plan records.

With sophisticated cross-register searching and reporting functionality, Portis seamlessly integrates with Issuer Online™ for local register investigation, delivering the world's most advanced global shareholder reporting system.

Offered in conjunction with Computershare's Global Register™, Portis ensures greater clarity and transparency of registered shareholder information for issuers and their company secretariat.

GLOBAL TOP HOLDER REPORTING

Reports on the top 200 global investors' share movements at the beginning and end of the month. Includes early warning mechanisms for indicating when depository accounts are out of balance with the underlying register.

AGGREGATE REGISTER REPORTING

Provides reporting of issued capital, including Depository Interest and American Depository Receipt holdings, aggregated across all registers globally.

GLOBAL HOLDER SEARCH

Issuers can search for holders across all registers, and seamlessly drill down into locally held information for more detail.

DASHBOARD

Presents a snapshot of data extracted from a suite of underlying reports, which can be exported in a variety of formats for flexibility.

ACCESSIBILITY

Available around the clock, Portis delivers greater clarity and transparency of registered shareholder information, removing the burden and cost of multiple service providers and disconnected online systems.

PART OF THE GLOBAL REGISTER

As a core component of our global solution, Portis couples with other Computershare services and cross-border capabilities to deliver unparalleled convenience and improved stakeholder relationships.

THE GLOBAL REGISTER > SUPPORTING THE PORTIS WEB SERVICE

WHAT IS THE GLOBAL REGISTER?

As our clients have globalised and sought access to capital from markets around the world, we have developed a global platform to enable a consistent level of service to investors and issuers alike. This is known as the Global Register.

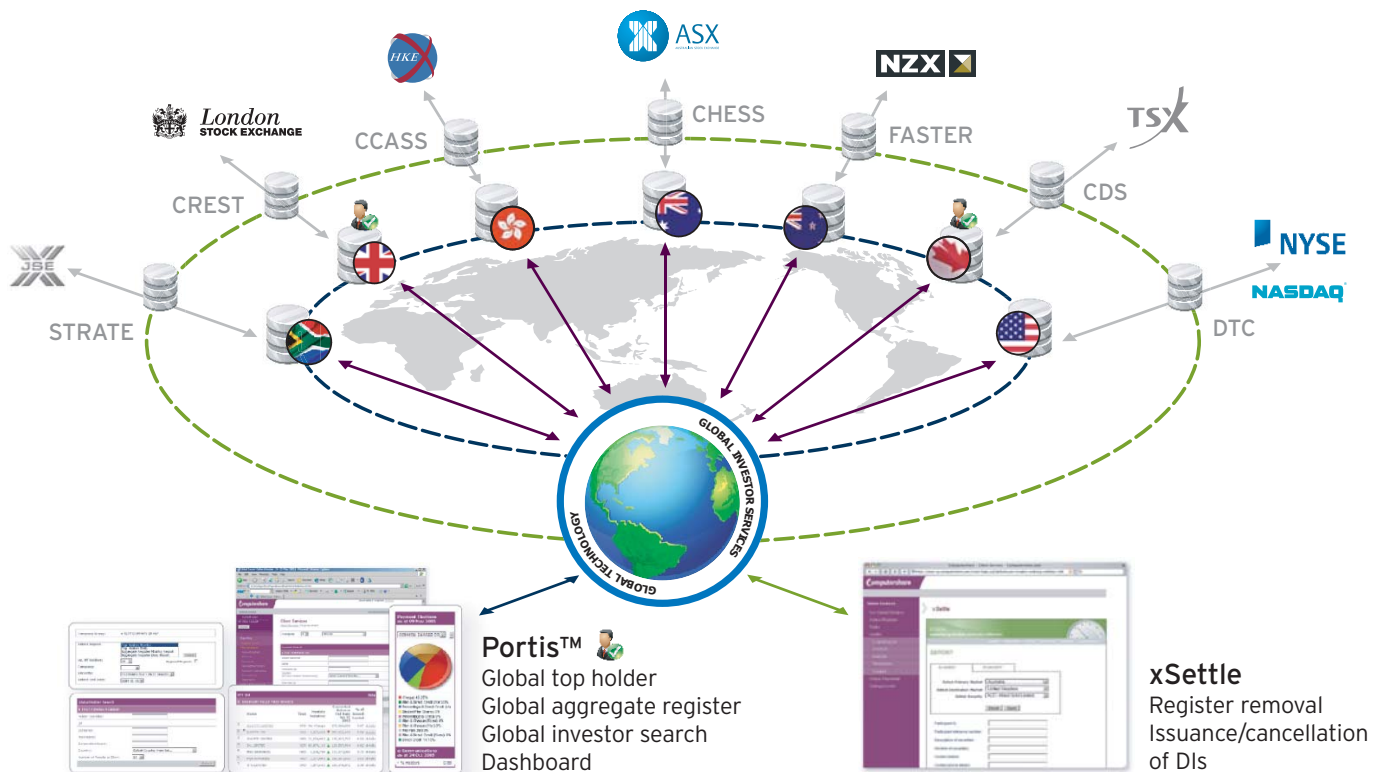

The Global Register provides an integrated registration service spanning multiple jurisdictions, generally encompassing two or more major time zones.

With interlocking components, including Depository Interest and our Portis and xSettle web services, our solution can be streamlined and managed from the country in which you are headquartered.

Our global capabilities enable our clients to benefit from fully customised solutions - even in markets where Computershare does not have a physical presence. These solutions may include equity plans, proxy solicitation, AGM logistics and specialist communication programmes.

BENEFITS OF THE GLOBAL REGISTER

- > Increased convenience and transparency
- > Mitigation of risk through our integrated services
- > Improved transaction processing time and efficiencies
- > Consolidated administration, reporting and analysis gives accurate 'at a glance' information
- > Single point of access to all registers and custodian positions makes monitoring easy
- > Global relationship management and local service support.

Our Global Register solution can link two or more markets, such as LSE and NYSE; with ADR service delivered in partnership with Citigroup. Portis provides a consolidated view of all registers and access to sophisticated reporting features.
